

Mechanisms for monitoring management effectiveness and evaluation system

Mechanisms for monitoring management effectiveness and evaluation system serves establishment of an approach, that will promote organization to achieve its goals and implement its tasks rapidly, with low costs and high quality.

The document sets the ways that serve to raise efficiency in the way university operates, mechanisms of monitoring, either on structural level or per employee.

The goal of an effective management is to realize all the goals defined by strategic plan.

The document shall ensure effective management of the following issues:

- University strategic plan making and its progressive development
- Definition, evaluation and analysis of strong and weak points of an organization
- Having considered any changes that may take place within or beyond the organization, specifying/changing strategic goals and ensuring necessary conditions for their implementation

Mechanism and evaluation system

Flowing out of its functions and tasks, the process is perceived as a self-regulation, which ensures feedback in the process of management.
