

Mission of the University of Georgia

Our job is to produce knowledge and educate a person, by which we mean to incite liberal-humane values in a person, and to equip him/her with the knowledge and skills necessary to succeed in good faith.

We do this by creating competence centers and a platform where the creation and implementation of educational programs tailored to the market requirements is ensured; by creating an environment where a person is given the maximum arena for detecting and realizing creative, innovative and entrepreneurial opportunities.

Through our work, which we constantly carry out with an innovative approach, as well as by our own example of striving for institutional perfection, we contribute to the democratic development of society for the benefit of the Georgian nation and humanity.
